FALL STYLES FOR THE SMART SET.

What the Leaders of Fashion Will Wear in the Way of Street Suits, Hats and Furs.

Despite the fact that the summer girl | headgear and used for every purpose is still in evidence and the summer gowns still hold sway locally, the autumn season is imminent in the styles which have been slowly making their appearance for the past fortnight are out almost in full display.

The millinery openings proper will not take place for another week yet, but the new hats are seen in the shop windows and the forehanded women have already bought a few for the every day wear of early autumn.

season of color in Nature's own handiwork will not rival the millinery season of the autumn of 1905. Gorgeous is the only word to describe the man vels of creations in the line of head-gear which will be shown in the local shops in a few days. Despite, however, the high tones in reds, greens and purples, there will be a distinct run on black and white, both singly and in combination. More red will be worn than in many seasons past, and among the reds are many shades new to the eyes of even the connoisseur on colors Reds and dregs of wine, deep maroon cardinal, cherry, old rose, deep rose and scarlet are all found in headwear and all other parts of the external wardrobe. Next to the reds come the shades of purple which are manifold and varied. Combined with the purples are the lavendars which blend with every other color in the rainbow, and many never seen in connection with it. varieties than ever before. Deep rich green is varied with a golden green which has a warmth of cheer in it not found in the ordinary green. Olive greens, sage greens and reseda greens are still to be seen in profusion.

You Must Wear Alice Blue.

Of all the blues Alice blue is the This is combined with lighter choice. This is combined with lighter shades and with navy as well, but if one wears blue at all one must wear Alice blue. The peculiar shade is most becoming to brunettes with color, but should under no consideration be as-sumed by those of washed out appearance as it tends to soften all tones. The product of London has at last been utilized and among the fashions one no longer finds a dull heavy gray, but the popular London smoke has taken its place and become marketable at least in name. London smoke is just what its name implies, a heavy, dull gray, with a tinge of murkiness in it. in a rich velvet with the relief of light-er tones, or something extra bright for a touch, is a regal color, and wonderfully enhancing to a deep crimson cheek. Everything Is Mink in Furs.

In furs one may safely say every thing is mink. Of course there will be

other furs worn, but mink has taken

a sudden rise and is ahead of all the others in price, which will set the

style. Gray squirrel has taken a back seat, the days of its popularity having

passed, and the deep rich brown of the mink will be seen more than any other

fur for street wear. Some novel styles

are shown in the latter, one being a muff of eight skins so arranged that

when the muff is held in the hand the two rows of wink tails overlap one

another. A boa to go with this is in

butterfly effect, three triangular pieces on each side making a set of wing-

like fronts. No distinct changes are

noted except in the kind of furs used,

but it is safe to say the long-tied boa

so popular in the late season last year will be worn more than ever

A velvet hat of London smoke is one of the most extreme styles to be found.

The soft crown is of the deep-toned velvet, while from under the brim fall two long plumes of deep corn color shading almost to orange, and around the crown a wreath of tiny roses of faded lavendar is intertwined with a band of cut steel buckles.

Street Suits Are Quieter.

But it is in the costumes that one sees the extremes of styles, for while the indoor and reception toilettes are more elaborate than ever the street clothing bids fair to be of plainer and more or less obtrusive styles than have ever been seen. To begin with the street clothing, the weight is much lighter than ever before; which would seem to indicate that furs are to be worn even more extensively and in larger gar-ments than heretofore. The material used in making the street suits is either lightweight broadcloth, covert cloth, Scotch mixtures or even brilliantines. The main style shown as yet is the long coat, tight fitting, both back and front. The short coat will, however, hold its own for so many women are found who do not wear the long styles with either comfort or comeliness that the short coat will have its way.

Some of the new shades of red are
